SAN DIEGO STATE UNIVERSITY

Adventures in Bayesian Structural Time Series

Part 3: Analyzing SST Data

Andrew Bates, Josh Gloyd, Tyler Tucker

Outline

SAN DIEGO STATE UNIVERSITY

- SST Data

Outline

SAN DIEGO STATE UNIVERSITY

- SST Data
- Use `bsts` for

Outline

- SST Data
- Use `bsts` for
  - Fit

Outline

San Diego State University

- SST Data
- Use `bsts` for
  - Fit
    - local level

Outline

- SST Data
- Use `bsts` for
  - Fit
    - local level
    - local linear trend model

Outline

- SST Data
- Use `bsts` for
  - Fit
    - local level
    - local linear trend model
    - local trend with seasonality

Outline

- SST Data
- Use `bsts` for
  - Fit
    - local level
    - local linear trend model
    - local trend with seasonality
  - Posterior distribution

Outline

- SST Data
- Use `bsts` for
  - Fit
    - local level
    - local linear trend model
    - local trend with seasonality
  - Posterior distribution
  - Forecast

Outline

- SST Data
- Use `bsts` for
  - Fit
    - local level
    - local linear trend model
    - local trend with seasonality
  - Posterior distribution
  - Forecast
  - Model Comparison

SST Data

SAN DIEGO STATE UNIVERSITY

- Sea Surface Temperature near Gibraltar

SST Data

- Sea Surface Temperature near Gibraltar
- Collected every 12 days

SST Data

San Diego State University

- Sea Surface Temperature near Gibraltar
- Collected every 12 days
- January 2004 to November 2017

SST Data

- Sea Surface Temperature near Gibraltar
- Collected every 12 days
- January 2004 to November 2017
- Obtained from Argovis

SST Data
